

Prometeon tyres equip the new MMT EVO5 as MM Technology unveils its latest rally truck

Milan, 30 July 2026 – **Prometeon Tyre Group**, a global manufacturer of tyres for the commercial, agricultural and OTR sectors, celebrates another major milestone in its long-standing technical partnership with **MM Technology**, following the unveiling of the new **MMT EVO5**, the latest evolution of the rally competition truck developed by the Czech company.

The MMT EVO5 represents the latest evolution of MM Technology's rally truck range. The Czech company is recognised as one of the world's leading manufacturers and developers of rally competition trucks and was co-founded by **Martin Macík Jr.**, a two-time Dakar Rally winner and champion of several other prestigious events, including the Baja Aragón and the Rallye du Maroc. The experience and data acquired by the MM Technology Factory Team and MMT client teams, also during this year's Dakar Rally, have directly fed into the development of the new vehicle. Key upgrades include reinforced chassis components, a stronger cab structure, and a new shock absorber configuration developed in close collaboration with suppliers.

The launch of the new truck also marks another important step forward for Prometeon Tyre Group, MM Technology's exclusive **original equipment (OE)** tyre partner. Every rally truck produced at MM Technology's facility in Sedlčany is equipped with Prometeon tyres, highlighting a technical partnership built on a shared commitment to continuous research and development and ambitious performance goals.

This continuous innovation is the result of a structured, ongoing joint development programme. The close collaboration between Prometeon's engineers, MM Technology and Martin Macík Jr. has driven the constant evolution of the company's rally tyre range: from the original **S02 Pista**, designed for the most extreme conditions, through the development of the **S02 Rally**, to today's **S02 Rally EVO** – the most advanced rally tyre ever developed by Prometeon.

The effectiveness of this joint development programme emerged yet again at the 2026 Dakar Rally, where MM Technology reinforced its standing as a leading manufacturer in the truck category. The company entered nine trucks, eight of which reached the finish line, while six secured places in the overall top ten. Both teams running on Prometeon tyres – the MM Technology Factory Team, led by Martin Macík Jr., and the ItalTrans Racing Team – finished the event within the overall top nine, once again confirming the reliability, durability and performance of Prometeon tyres under the most demanding racing conditions.

This development process continues relentlessly. In recent weeks, engineers from Prometeon and MM Technology conducted an extensive testing programme in the Tunisian desert, where they gathered valuable data to further refine both the tyres and the new truck ahead of the upcoming rally-raid season.

Motorsport continues to provide a unique proving ground for innovation, where every kilometre covered contributes to the continuous improvement of tomorrow's products.

Francisco Nascimento, Head of R&D Product at Prometeon, stated: *"Our collaboration with MM Technology goes far beyond a technical partnership. It is a genuine joint development programme built around continuous innovation. Having one of the world's leading rally truck manufacturers choose Prometeon as its exclusive original equipment tyre supplier is a source of great pride and enables us to develop our products in the most demanding environments imaginable.*

Martin Macík Jr. is an exceptional development driver whose feedback constantly pushes us to raise the bar. Together with the expertise of the MM Technology engineering team and our drive for innovation, we are even more confident in the capabilities of our latest generation of tyres, and are proud to see them fitted as original equipment on the new MMT EVO5 as it embarks on its competitive journey".

PROMETEON TYRE GROUP

Prometeon Tyre Group is the only tyre manufacturer fully focused on the commercial (transport of goods and people), agricultural and OTR sectors. Its multi-brand package includes leading brands such as PROMETEON, PIRELLI, FORMULA, PHAROS and ANTEO. The Group operates 4 production sites (2 in Brazil, 1 in Egypt, 1 in Turkey) and 4 Research & Development centres (Italy, Brazil, Turkey and Egypt). More than 7,500 people of nearly 40 nationalities work within the Group, present across all 5 continents.
